Hiring Manager
Seattle City Light
Seattle, WA

Dear Hiring Manager,

I am writing to express my interest in the GIS Analyst position (Job Number 2025-01497) at Seattle City Light. With over five years of experience in geospatial data analysis and a Master's degree in Civil Engineering from the University of Washington, I am excited to contribute to your GIS Spatial Analytics Team.

My experience directly aligns with your requirements. At Shannon and Wilson Inc, I develop research tools for LiDAR change detection and InSAR analysis. At the University of Washington, I worked extensively with ArcGIS, QGIS, and Python libraries including Arcpy, GDAL, Geopandas, Shapely, and Rasterio to analyze satellite imagery, LiDAR, and vector datasets. At Hexagon Geospatial, I performed real-time geospatial monitoring and delivered technical reports for infrastructure decision-making.

While my background is in Civil and Geological Engineering, I have substantial experience with infrastructure systems and spatial analysis of critical networks. My analytical skills and proven ability to quickly master new technical domains will enable me to effectively support Seattle City Light's utility operations. I am confident I can rapidly develop the utility-specific expertise needed for this role.

Thank you for considering my application. I am eager to discuss how my geospatial expertise can support Seattle City Light's mission. I am available at your convenience and can be reached at +1 206-730-9007 or laghoyos@gmail.com.

Sincerely,

A handwritten signature in black ink, reading 'Luis Angel Guerrero Hoyos' in a cursive script.
